

MITASH

Data Analyst / AI & Data Science

Dehradun, Uttarakhand, India • [LinkedIn: linkedin.com/in/mitashsharma](https://www.linkedin.com/in/mitashsharma) • [GitHub: github.com/mitashsharma](https://github.com/mitashsharma)

PROFESSIONAL SUMMARY

BCA (AI & Data Science) student who has shipped three working data products — from an AST-based Python error detector to Tableau downtime dashboards — combining Python, SQL, and statistical analysis to turn raw data into decisions. Seeking a Data Analyst role to bring that same build-first instinct to real business problems.

TECHNICAL SKILLS

Programming & Query: Python (NumPy, Pandas, Matplotlib, Scikit-learn), SQL, JavaScript

Data & Visualisation: Tableau, Matplotlib, Excel, dashboard design, telemetry data analysis

ML & AI: ML classification pipelines, NLP (keyword & fuzzy matching), pricing models

Tools & Frameworks: Flask, SQLite, Git, GitHub, VS Code, Render

EDUCATION

Bachelor of Computer Applications (BCA) – AI & Data Science | *Graphic Era Hill University (GEHU), Dehradun* | 2024– 2027

- Specialisation: Artificial Intelligence and Data Science
- Key coursework: Data Analytics using Python, Machine Learning, Data Communication & Networks, MIS, Web Development

VIRTUAL EXPERIENCE

Quantitative Research Virtual Internship | *JPMorgan Chase & Co. (Forage)* | 2026

- Built quantitative pricing models applying [specific method, e.g. bond/options pricing] to real financial datasets, replicating workflows used on live investment-banking pricing desks
- Applied statistical methods to model and analyse financial data across [X] scenarios/datasets
- Gained hands-on exposure to quant research workflows used in asset pricing and investment banking

Data Analytics Virtual Internship | *Deloitte (Forage)* | 2026

- Analysed factory telemetry data across [X] machines / [X] locations to surface downtime patterns, enabling [X%] faster root-cause identification
- Built Tableau dashboards comparing downtime by factory location and device type, translating raw operational data into executive-ready visual insights

KEY PROJECTS

GEHU AI Chatbot | *Flask / SQLite / JavaScript / NLP* | 2025

- Built a college query chatbot handling [X]+ FAQ intents using keyword and fuzzy-matching NLP with Flask and SQLite
- Designed a glassmorphism frontend with an admin panel enabling non-technical staff to manage FAQs directly

CodeScan – Code Error Detector | *Flask / Python AST / Multi-language* | 2025

- Built an AST-based static analyzer catching Python logic errors across [X] test cases / [X%] accuracy
- Extended detection to multi-language syntax checking; deployed live on Render via GitHub and VS Code

CERTIFICATIONS&COURSEWORK

- JP Morgan Quantitative Research Virtual Experience – Forage (2026)
- Deloitte Data Analytics Virtual Experience – Forage (2026)
- Data Analytics using Python – GEHU (NumPy, Pandas, Matplotlib, statistics)
- Quantitative Aptitude&Placement Preparation – percentages, profit/loss, time-speed-distance

SOFT SKILLS

- Analytical thinking and quantitative problem solving
- Clear communication of data insights to technical and non-technical audiences
- Self-driven learner with a practical, project-first approach
