PROFESSIONAL SUMMARY

Aspiring Data Analyst and AI/ML developer (BCA, AI & Data Science) skilled in Python, SQL, Pandas, Tableau, and scikit-learn. Built NLP, machine learning, dashboarding, and insight-generation projects, and analyzed operational and financial datasets.

EDUCATION

Bachelor of Computer Applications (BCA), AI & Data Science | Graphic Era Hill University, Dehradun *2024 – 2027*
CGPA: 7.94 | Coursework: Data Analytics, Machine Learning, Data Communication & Networks, MIS, Web Development.

TECHNICAL SKILLS

Languages: Python, SQL, C/C++, JavaScript
Data Analysis: Pandas, NumPy, Statistics, Data Cleaning, Exploratory Data Analysis (EDA)
Visualization: Tableau, Plotly, Matplotlib, Excel, Dashboard Development
ML & AI: scikit-learn, Azure ML Studio, Classification, NLP, ML Pipelines, Fuzzy Matching
Tools & Databases: SQLite, Flask, Streamlit, Git, GitHub, VS Code, Render

TECHNICAL PROJECTS

AI-Powered Offline Data Visualizer & Insight Generator | Python, Flask, Pandas, Plotly, ReportLab *2026*
GitHub: https://github.com/mitashsharma/Visualizer.git

- Engineered an offline analytics tool for dataset exploration, cleaning, and insight generation with no cloud dependency.
- Built interactive Plotly charts on Pandas-processed data and exported polished PDF insight reports using ReportLab.

GEHU AI Chatbot | Python, Flask, SQLite, SequenceMatcher *2025*
GitHub : https://github.com/mitashsharma/chatbot.git

- Built a college-query chatbot using keyword and fuzzy-matching NLP , backed by Flask and SQLite.
- Designed a frontend with an admin panel that lets non-technical staff manage FAQs directly.

ML WORKSPACE: Predictive Modeling | *2025*
GitHub : https://github.com/mitashsharma/ml_studio.git

- Built a machine learning model covering data preprocessing, training, and prediction in Azure ML Studio.
- Evaluated model performance with standard metrics and visualized results to identify patterns and improve predictions.

EXPERIENCE

Data Analytics Virtual Internship | Deloitte (Forage) | Tableau *2026*

- Analyzed factory telemetry across multiple machines and locations to surface downtime patterns and speed up root-cause identification.
- Built Tableau dashboards comparing downtime by location and device type, turning raw operational data into executive-ready insights.

Quantitative Research Virtual Internship | J.P. Morgan (Forage) | Python *2026*

- Built quantitative pricing models using standard bond and options pricing methods on real financial datasets.
- Applied statistical methods to model and analyze financial data across multiple market scenarios.

CERTIFICATIONS

- Data Analytics using Python
- J.P. Morgan Quantitative Research Virtual Experience, Forage (2026)
- Deloitte Data Analytics Virtual Experience, Forage (2026)
